

46th CONGRESS OF EUROPEAN SOCIETY OF LYMPHOLOGY - ESL

Domus Pacis • Santa Maria degli Angeli • Assisi • Italy

JUNE 16-17-18, 2022

IN PERSON AND VIRTUAL EVENT

Congress President
Marina Cestari

Scientific Coordinator
Sandro Michelini

FINAL PROGRAM

Dear Friend Lymphologist,

we have just lived an inedited sanitary emergency, COVID-19 pandemic. This situation has conditioned many aspects of our life, health, family affections, work and the world economy. In the same way, the conference activities have also been interrupted for long.

Although we are at the beginning of a possible return to an almost normal situation, the President of the Congress, together with the Scientific Coordinator, myself and the members of the Executive Committee have courageously decided to set the new dates of the congress on June 2022. We all intensely desire to be able to meet again, to exchange our scientific opinions, to stay together even on convivial occasions and to continue the activity of our society, with the aim above all to update ourselves on new scientific researches in the lymphological field, stimulating the participation of young lymphologists, and expand lymphological knowledge all over Europe.

The Congress of the European Society of Lymphology 2022, which Marina and Sandro are planning with considerable organizational efforts will certainly be an opportunity for the growth of the ESL under different points of view. In the meanwhile, the activity of the Society and the interest in the European Lymphology have been definitely live and dynamic.

Finally, I am really pleased to welcome you all to our meeting and hoping in a return to normal as quickly as possible.

Francesco Boccardo
ESL President

Dear Colleagues,

after two years of postponements, I am pleased to finally welcome you to the 46th Congress of European Society of Lymphology taking place in Santa Maria degli Angeli - Assisi on the 16-18 of June 2022.

The aim of the Congress is to contribute to the progress in the field of Lymphology through the scientific programme and will include lectures and free paper sessions as well as workshops and poster session. I thank you for your updated contributions on new research in the lymphological field.

I hope you will enjoy the Congress and the city of Assisi, a UNESCO world heritage site full of history, art and spirituality.

Marina Cestari
