

European Society
of Vascular Medicine

IX

CONGRESS OF THE

EUROPEAN SOCIETY
OF VASCULAR MEDICINE

SAVE the DATE

Milan, 12-14 October 2023

Educate, Share and Collaborate !

Thursday October 12th

- 10:30-11:30** **Master classes**
MC1: DUS venous insufficiency assessment: what a young angiologist should know
MC2: DUS carotid artery assessment: it is all a matter of “angle”
- 11:30-12:30** **Master classes**
MC3: The secrets of compression treatment
MC4: A “basic” arterial endovascular revascularization procedure explained to the non interventionalist
- 13:00-14:30** **Plenary session 1**
CAROTID ARTERY STENOSIS, WHERE DO WE STAND IN 2023?
- Stroke: state of the art what is new?
 - Criteria for Carotid artery stenosis: are we still debating?
 - Asymptomatic carotid artery stenosis: Intervention or best medical therapy only?
 - When and how to treat symptomatic carotid artery stenosis?
 - Do we need to follow up patients with carotid stenosis?
- 14:30-15:30** **Symposium 1 and 2 (Industry)**
- 15:30-16:00** **Coffe Break and poster viewing in exposition area**
- 16:00-17:00** **Parallel Session 1**
PERIPHERAL ARTERY DISEASE, LOOKING BEYOND LOWER LIMBS
- Mesenteric artery stenting: when and how?
 - Subclavian and brachiocephalic stenting: indications and techniques
 - When and how should we treat renal artery stenosis?
 - Radial artery occlusion: how should we treat?
- 16:00-17:00** **Parallel Session 2**
VENOUS DISEASES
- Pelvic congestion syndrome: a 2023 update
 - Superficial venous treatment in ulcer care
 - Venous ablation, what are first line options in 2023?
 - May Thurner syndrome from A to Z
- 17:00-17:45** **OPENING CEREMONY**
- 17:45-18:30** **Keynote 1**
- Does hemodynamics have a sex ?

Friday October 13th

- 08:00-09:00** **Breakfast with the expert**
Chairs:
Breakfast with the editor of VASA
- 09:00-10:30** **Plenary session 2**
LYMPHOEDEMA AND LYMPHATICS
- Imaging of lymphatics: how, when, why?
 - Surgical treatment of lymphedema: for whom, how, when?
 - Differentiating between lipoedema, lymphoedema and obesity
 - Are genes involved in lymphatic failure?
 - Mechanisms of lymphatic renewal and repair
- 10:30-11:00** **Coffe Break and poster viewing in exposition area**
- 11:00-12:00** **Parallel session 3 in collaboration with the Italian Society of Vascular Medicine (SIAPAV)**
LIFESTYLE AND ARTERIAL DISEASE
- Peripheral artery disease: Mediterranean diet for all?
 - Electronic cigarette: a false "good" thing?
 - Pollution and peripheral artery disease
 - What about a cup of tea, coffee, or chocolate?
- 11:00-12:00** **Parallel session 4:**
CRITICAL LIMB ISCHEMIA AS MULTIDISCIPLINARY TASK
- Are we ready for consensus definition and assessment?
 - What should we do for revascularization after BEST CLI?
 - Pro
 - Contra
- 12:00-13:00** **Why we need a strong European Society of Vascular Medicine?**
- Why ESVM?
 - European guidelines and consensus papers: Update
 - Are we ready for European Vascular training requirements and exam? Role of ESVM
 - Vascular medicine: The USA experience
 - Round table
- 12:00-13:00** **Lunch and poster viewing in exposition area**
- 13:00-14:30** **Plenary session 3**
PERIPHERAL ARTERY DISEASE: UNSOLVED ISSUES
- Who to screen for PAD, are we ready for a consensus?
 - Exercise and PAD, are we ready for a consensus?
 - Are we ready for circulating biomarkers use in PAD?
 - Common femoral artery revascularization: endovascular or surgical: how and why?
 - Can artificial intelligence lead to better outcomes?

14:30-15:30 **Symposium 3 and 4 (Industry)**

15:30-16:00 **Coffee break and poster viewing in exposition area**

16:00-17:30 **Plenary session 4: Joint session with the European Society of Atherosclerosis**

PAD PATIENTS: A HIGH CARDIOVASCULAR RISK PATIENT

- “Vulnerable” plaques, where do we stand and where are you going?
- Follow up of patients with PAD: When, how and what intervals?
- CV risk estimation and management in women
- Tryglicerydes and residual cardiovascular risk
- New paradigm in lipid lowering
- Lp(a), cardiovascular risk and PAD

17:30-18:30 **Parallel session 5: Joint session with the ESC WG Aorta &Peripheral vascular disease**

AORTA

- AAA: when to screen and when to treat
- Non-atherosclerotic aortic diseases
- Imaging of aortic diseases
- AAA: Open or Endo - which method for which patient

17:30-18:30 **Parallel session 6:**

MICROCIRCULATION

- How to assess microcirculation ?
- Contribution of oligodendrocyte precursor cells to cerebral small vessel disease
- Vascular-macrophage crosstalk in the muscle
- Exercise to reverse microvascular dysfunction induced by age and lifestyle

Saturday October 14th

- 08:30-09:30** **Parallel session 7:**
ANTITHROMBOTICS IN VASCULAR DISEASES
- In daily practice, have we really adopted the COMPASS and Voyager data with regard to PAD treatment?
 - Does it make sense to screen for non responders to aspirin and clopidogrel?
 - Which DOAC for which indication?
 - Is there still a need for dual antiplatelet therapy following arterial revascularization, and for how long?
- 08:30-09:30** **Parallel session 8**
DIABETES AND VASCULAR DISEASES
- Are all antidiabetic agents equally beneficial in PAD patients?
 - Screening for PAD in diabetics: When should it start, how and how often?
 - Multidisciplinary diabetic foot teams: early diagnosis and aggressive treatment
 - When vascular physicians should care about diabetes?
- 09:30-10:00** **Keynote 2**
The challenges of frailty in PAD management
- 10:00-10:30** **Coffee break and poster viewing in exposition area**
- 10:30-11:30** *Parallel sessions organized by the young ESVM angiologists
Joint with the French Society of Vascular Medicine*
- 1. Young academy session 1 (case based)**
RARE VASCULAR DISEASES
- A case of vascular Ehlers-Danlos syndrome (vEDS)
 - Overview on vEDS
 - A case of antiphospholipid syndrome
 - Overview on antiphospholipid syndrome
- 2. Young academy session 2**
NEW INSIGHTS ON VASCULAR ANOMALIES
Pathophysiology and current classification of vascular anomalies
- The genetic basis of vascular anomalies: current data and future therapeutic perspectives
 - Interventional therapy of vascular anomalies: past, present and future
- 11:30-12.45** **Plenary session 5 joint session with SVM**
VENOUS THROMBOEMBOLISM
- The post thrombotic syndrome and elastic stockings: are we missing something?
 - Pregnancy and pulmonary embolism, is risk stratification working ?
 - VTE and the cancer patient: which anticoagulant therapy ?
 - Interventional treatment options for PE, has their time come ?
- 12:45-13.15** **Concluding remarks/prizes**
