WELCOME TO VEIN IN VENICE

This conference was born and evolves in the footsteps of previous events entitled **Note Tecniche Chirurgiche Ambulatoriali nella Cura dell'Insufficienza Venosa – Edizione I e II**.

Vein in Venice (veininvenice.com, linkedin.com/in/vein-in-venice-symposium) is an international meeting with a precise mission: to promote, share and train in the venous vascular field (from diagnostics, to medical and surgical therapies to the field of Aesthetic Phlebology). The keyword that best describes this new international event is “**to share**”.

This symposium aims to be a platform capable of creating sharing and training, in the vascular and endovascular field, relating to venous pathology. It often happens that in the major **International Vascular Surgery Symposiums** the topic of Phlebology is less central. However, more than ever, Phlebology is experiencing a huge development in the field of research, development and technology. Therefore, with *Vein in Venice* we aim to create an international event that has this mission: to promote, share and train in the venous field.

Likewise, we aim to create an interactive environment, in which participants can ask questions in plenary sessions (we give the same time to presentation and questions) but also participate in theoretical and practical workshops (hands on it). In fact, workshops and round tables are planned in which specific topics, techniques, therapies or devices can be explored in depth.

The target audience is *Vascular Surgeons, General Surgeons, Angiology Specialists, Phlebologists, Interventional Radiologists, Vascular Medicine Specialists, Dermatologists, Technicians, Residents* and all others interested in the management of *Venous Disease*.
